

CLAIMS

1. (Amended) A projection type display apparatus employing a liquid-cooled cathode-ray tube apparatus provided with liquid-cooling means in which cooling liquid to cool the front panel of a cathode-ray tube is sealed, comprising:

a tray to receive and hold leaked cooling liquid, which is provided on the lower side of said liquid-cooling means in said liquid-cooled cathode-ray tube apparatus.

2. A projection type display apparatus according to claim 1, wherein

ribs are provided on the upper side surface of said tray and the tray is divided into squares by the ribs.

3. A projection type display apparatus according to claim 1 or 2, wherein

hooks are provided on the lower side surface of said tray and high-voltage wiring is supported by the hooks.
